

CARE OF GOD'S CREATION

CARE OF CREATION

It is time for "A theology of the earth"

– Pope Benedict

Environmental challenges and climate change are not only an issue of science, but it is a moral and spiritual problem. Now is time for our catholic communities to examine the teachings of our Church and develop plans of action for the enhancement of the earth, protection of all created beings and the overall care of God's creation.

*"Praised be You,
my Lord, through
Sister Earth our
Mother who
sustains and
governs us."*

– St. Francis of Assisi

SMALL WAYS YOU CAN MAKE A DIFFERENCE TODAY

Petition policy makers:

Elected officials have the power to take bold action on climate change.

Calculate your carbon footprint:

The EPA has a free carbon footprint calculator you can use.

Adjust your driving routine:

Combine multiple errands into one trip.
