

## An ICS COVID Catalog...

A variety of Products that will help you maintain a  
germ-free workplace and observe social distancing guideline

The FEMA-eligibility period for ordering and seeking reimbursement for PPE and other pandemic cleaning-related supplies has been extended. At this writing, the exact end dates are unclear. I want to encourage you to check your supplies and consider reordering items you will need in the foreseeable future. We believe that most, if not all, of the items in this brochure are reimbursable.

The reimbursement process is being managed by Al Kelly in the Insurance Division of the Archdiocese. Please contact him at FEMA.Grants@Archny.org if you have not already done so. He is collecting parish and parish based school information for a consolidated reimbursement request. Repeated thanks for your business. We are proud to serve you.

# Disinfectant Wipes

DECONTAMINATE AND DISINFECT IN ONE EASY STEP

Decontaminate and  
disinfect in one easy step

Kills 99.99% of common  
disease-causing organisms

The latest product evolution from the creators of Benefect is Botanical Disinfectant Wipes! Specifically designed for the needs of the restoration contractor and to complement our Botanical Disinfectants & Cleaners.

EPA registered to kill over 99.99%\* of common disease-causing organisms such as Staph, Salmonella, Pseudomonas, E-coli, Influenza (flu virus), MRSA, Enterobacter and Rhinovirus. The convenient single-use wipe will prevent cross-contamination on any surface where germ control could be an issue.

Combining the same proprietary Botanical Active Ingredient that Benefect is known for, with a new, extremely durable, wood pulp wipe, we have created a Restoration Grade product that is strong enough to tackle rough surfaces like wood and concrete with no shredding, pilling or lint left behind.

Adding the Benefect Decon 30 platform to a dense woven wipe also gives it a distinct foaming advantage that ensures longer contact time to kill germs and improved visibility of surface coverage over conventional wipes. Surfaces are left clean and decontaminated with no streaky residue. Just wipe and walk away!

Ideal for decontamination, preventing cross-contamination, cleaning, disinfecting and deodorizing surfaces such as equipment, PPE, or building contents. Also ideal for controlling the spread of germs by disinfecting high-touch areas in residential or commercial cleaning.

**Strong, Durable  
Wipe**

**Benefect Wipes**

- \* 250 wipes per pail
- \* \$40.00 per pail (delivered)

- \* \$ 10.70 per bottle

In an Instant

- \* Soap sanitizer
- \* Individual pouch: \$4.95
- \* Case of eight pouches: \$116.00

## Consider enrolling in our **Purell Recurring Order Program**

- **Why enroll in this program?**

No doubt there will continue to be extraordinary demands for this product for the foreseeable future, if not forever. As this is the case, the program represents an easy means for you to be sure that you have a steady supply of hand sanitizers at all times by enrolling, you will always have an inventory of a quality hand sanitizer and this will become one less item that you will have to worry about ordering as you look to maintain a clean, germ-free environment in your workplace.

- **How does the program work?**

Once enrolled, you will automatically receive one case of twelve (12) 16 oz bottle of Purell will arrive during the second week of the month of your scheduled delivery.

- **What if you do not need a delivery every other month?**

There is a 'skip order option' that can be used two times - that is, of the six deliveries scheduled in a year, you only expected to commit to accepting four of them.

- **What is the cost of the program?**

The cost it is \$110.00 per case of twelve (12) 16oz bottle which includes delivery.

# Virus Sanitization Evaporator (VSE)

An Easy to use, **do it yourself** specialized device

**CK-MINI-S**

**VSE PROPACK**

**BACKPACK ACCESSORY FOR CK-MINI MACHINES**

Pandemic Solutions LLC (PS) - ICS has partnered with PS because the company specializes in VSEs that are designed to allow a single individual to apply (spray) a disinfecting mist from a distance ranging from four feet to fifty feet from the point of 'spray.' The disinfectant can be applied very quickly, in fact in just 60 seconds, these VSEs can disinfect targeted areas ranging from 400 square feet to as much as 10,000 square feet.

PS also provides an EPA listed disinfecting concentrate - VS- 1000, (which is hydrogen peroxide-based). This concentrate is safe, when mixed with water, provides for reliable and convenient spray application that reduces blood borne bacteria or viruses from non porous surfaces. ICS arrangement with PS allows you to purchase both the equipment and the compatible solvents at discounted pricing.

## INTERESTED?

Take a look at Pandemic's product(s) by going to <https://nyics.org/sanitizing-machine>; among other things, you will be able to view a video that demonstrates how the VSE is used and operated.

## Contact Pandemic Solutions Directly

discuss best models for your church/common areas, cost options (for machines and solvents), and you can schedule telephonic training on how to properly use the device

## P3000 Air and Surface Purification System

### CREATES SAFE AIR IONS TO CLEAN THE WHOLE ROOM

Puraclenz uses an evolved form of photocatalytic oxidation developed for NASA that has been safely used for over 40 years.

Generates the most powerful chemically generated positive and negative ions.

- Purifies SURFACES missed during human cleaning
- Cleanses AIRBORNE respiratory droplets

Puraclenz creates safe ions to continuously disinfect entire interior rooms (3,000 square feet) – both surfaces and air using technology that is proven to eliminate viruses, dangerous bacteria and toxic gases with no ozone.

Visit the ICS website to view how Puraclenz P3000 protects - follow the link to a video:

For questions contact the ICS Customer Care Team at 646-794-2600.

Certifications: The model P3000 has passed the following certifications performed by Intertek Testing Service and reports will be available in early January 2021:

1. ETL-US Listed conforming to UL507 standards.
2. UL587 Section 40 – test showing zero ozone emissions.
3. FCC compliance.
4. CARB (California Air Regulation Board) – gold standard for air purifier safety.
