

ICS Introduces **puracenz**

P3000 Air and Surface Purification System

CREATES SAFE AIR IONS TO CLEAN THE WHOLE ROOM

Puracenz uses an evolved form of photocatalytic oxidation developed for NASA that has been safely used for over 40 years.

Generates the most powerful chemically generated positive and negative ions.

- Purifies SURFACES missed during human cleaning
- Cleanses AIRBORNE respiratory droplets

Puracenz creates safe ions to continuously disinfect entire interior rooms (3,000 square feet) – both surfaces and air using technology that is proven to eliminate viruses, dangerous bacteria and toxic gases with no ozone.

Visit the ICS website to view how Puracenz P3000 protects - follow the link to a video: <https://www.nyics.org/puracenz-air-and-surface-purification-system>

Product starts to ship the end of January,
to reserve your pre-order from ICS go to our website

Contact: Paul Gottwald, Director of Sales
Phone - 914-450-0890/ Email – pgottwald@puracenz.com
or Visit their website at <https://www.puracenz.com/>

For questions contact the ICS Customer Care Team at 646-794-2600.

Certifications: The model P3000 has passed the following certifications performed by Intertek Testing Service and reports will be available in early January 2021:

1. ETL-US Listed conforming to UL507 standards.
2. UL587 Section 40 – test showing zero ozone emissions.
3. FCC compliance.
4. CARB (California Air Regulation Board) – gold standard for air purifier safety.
